

PRECAUTIONARY BOIL WATER ADVISORY

For the Timberon Water and Sanitation District Water System

BOIL YOUR WATER BEFORE USING

Due to E. Coli detected in special samples during line repairs

BOIL YOUR WATER BEFORE USING

Fecal coliform [or *E. Coli*.] bacteria were found in the water supply on 8/14/2026. These bacteria can make you sick and are a particular concern for people with weakened immune systems.

Bacterial contamination can occur when increased run-off enters the drinking water source (for example, following heavy rains). It can also happen due to a break in the distribution system (pipes) or a failure in the water treatment process.

What should I do? What does this mean?

- **DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST.** Bring all water to a boil, let it boil for three minutes, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and food preparation until further notice. Boiling kills bacteria and other organisms in the water.
- **Fecal coliforms and E. Coli. are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Microbes in these wastes can cause diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a special health risk for infants, young children, and people with severely compromised immune systems.**
- The symptoms above are not caused only by organisms in drinking water. If you experience any of these symptoms and they persist, you may want to seek medical advice. People at increased risk should seek advice from their health care providers about drinking this water.

What is being done?

Water System Operations Personnel are working to disinfect affected areas within the distribution system. We will inform you when tests show no bacteria and you no longer need to boil your water. We anticipate resolving the problem on or before 8/17/2026.

For more information, please contact: Wendy Case (903) 327-6624 or Alex Salas (575) 932-8356

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
